

Corridor A

Long-distance rail transport is climate-friendly

around two-thirds less
Specific carbon emissions on average compared to road transport

75 percent less
Specific carbon emissions on average compared to air transport

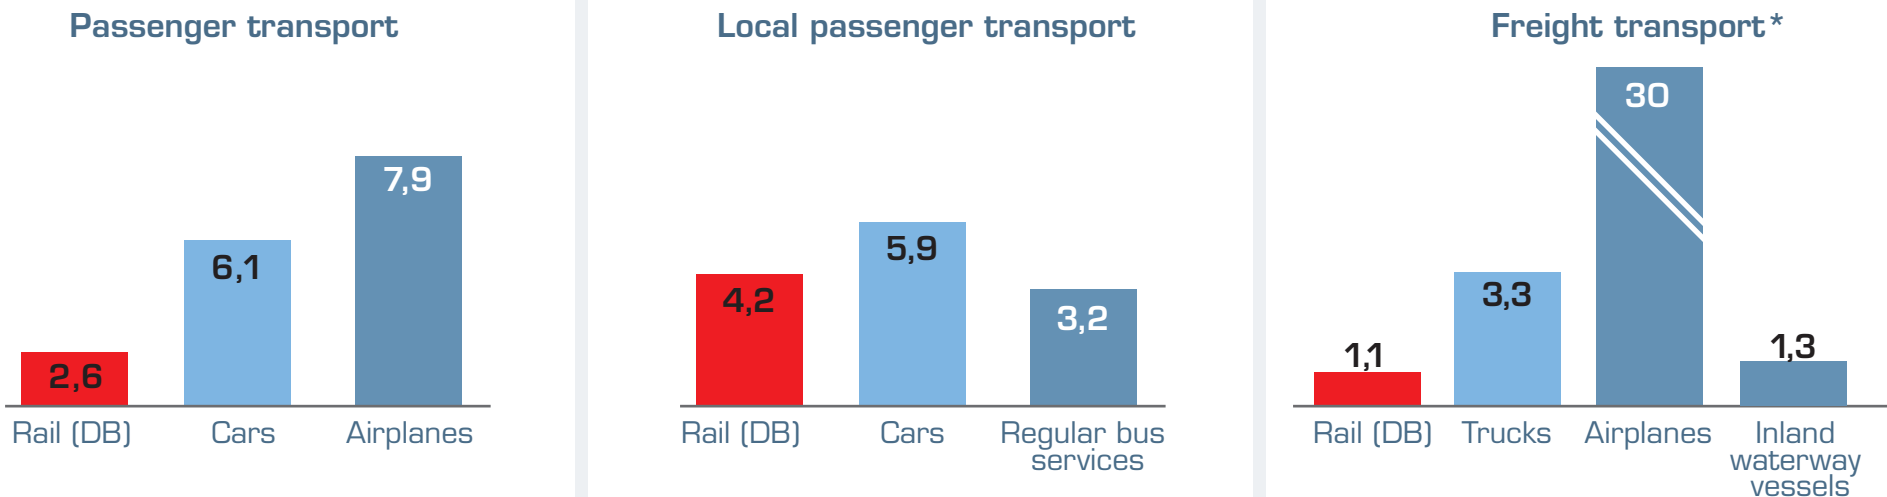

Carbon emissions for various means of transport

Carbon emissions in grams per passenger km (freight transport: per tonne km); data basis 2008, *referred to Europe

Source: DB AG, ifeu, Öko-Institut

Comparison of energy consumption of transport modes

Consumption of primary energy in litres of fuel per 100 passenger kilometres (freight transport: litres of Diesel per 100 ton kilometres); data basis 2008, *referred to Europe
